### Donate your surplus IT Equipment

We accept almost all working and selected non-working computer equipment. We guarantee\* that viable equipment or its component parts are refurbished and reused; any equipment that we scrap is ethically recycled all the way down to the plastic fascia.

\*All data on the Hard Drives of donated equipment is promptly and irrecoverably destroyed - see complete description of the process on our website:

[http://www.dot-communications.co.uk/data\\_deletion](http://www.dot-communications.co.uk/data_deletion)

### We are a Microsoft Authorised Refurbisher (MAR)

Under the MAR scheme, we can offer selected Microsoft products (see 'Software' box) at much reduced prices providing you fulfil the low-income criteria - Please phone for details.

### Repairs

We repair Computer Equipment at competitive rates. As an established refurbisher we hold stocks of used components which enables us to offer cheaper repairs of modern machines (if required) and to economically repair older equipment. We offer a discount to those least able to afford the cost of repairs i.e. students, the unemployed and pensioners. We give customers up to 15 minutes of free Fault-Analysis time and we don't charge for working on a machine if we subsequently fail to repair it.

All repairs are guaranteed.

### Computer Tune-Up

**Rejuvenate your Computer's performance (and get its Configuration and Security settings optimized) for £20**

The performance of most Computers deteriorates with normal usage. Adware, Spyware and even Malware are unsolicited downloads from the Web whose least effect is to increase the computer's workload. Program installs, un-installs and file deletions reduce the efficiency of the File System. Unlinked entries in the System's Database (Registry) cause problems as do out-dated Device Drivers and missing Security patches. Since none of these impairments are automatically rectified by the Operating System, the machine's performance decreases- it slows down. We developed our own program, 'Health Check', to cure these problems and to generally analyse a Computer's Configuration and Security set-up. 'Health Check' can take up to 5 hours to clean-up and analyse a machine but, since it runs mostly unattended, we can offer this service at a fixed price irrespective of the size or state of your machine's Hard-Drive.

### Hardware - continued

Sound Cards - from £3  
Or installed from £13

\*

Graphics Cards - from £3  
Or installed from £13
